

A PAMERINDO INDONESIA TRADE EVENT

Cutting.... Leave it to US

Booth No. F353

Manufacturing Indonesia is Asia's largest international manufacturing exhibition providing a professional business platform for Indonesia's manufacturing industry.

Now in its 28th edition, Manufacturing Indonesia is well known and respected among industry professionals. The show attracts industry leaders and key players in the global manufacturing industry who want to showcase their latest products and services in one venue, the Jakarta International Expo.

Manufacturing Indonesia 2017 is a highly focused manufacturing machinery, equipment, materials and services exhibition with 27 years of success. The event provides the perfect opportunity to meet face to face with potential clients who are actively looking for suppliers.

Glad to inform that Bipico is going to participate in this Exhibition from 6th to 9th Dec 2017 (Booth No. F353)

OUR BOOTH AT INDONESIA EXHIBITION

BIPICO®

Cutting... Leave it to us

ABRASIVES & FILES

ABRASIVES - CUTTING DISC & GRINDING DISC

DIAMOND SAW BLADES (MARBLE CUTTING BLADE)

FLAP DISC (ALUMINIUM OXIDE, ZIRCONIA OXIDE)

ALUMINIUM OXIDE FIBER DISC

VELCRO DISC

NON WOVEN PAD

RESIN METAL CLOTH TAPE ROLL

RESIN METAL CLOTH BELT

MOP WHEEL (FLAP WHEEL ON SHAFT)

SUPERCUT - STEEL FILES

TCT CUTTER

BIPICO

Cutting... Leave it to us

UNIVERSAL HOLE SAWS

Size: Depth 27 mm (1")

BIPICO Universal Hole Saws are manufactured from HSS. The tooth geometry of Hole Saw is specially designed by The Hole Saws are heat treated in fully automated CNC resulting consistency in hardness & better toughness. Use with arbor & Drill.

Salient Features & Advantages :

- ▶ Cutting depth is 27 mm giving double life than conventional Hole Saw
- ▶ Specially design & precision tooth geometry for cutting variety of material
- ▶ Cutting at higher speed with better and smooth finish.
- ▶ Useful in cutting of all different types of soft and hard material.
- ▶ Higher hardness & toughness of HSS teeth for excellent cutting & long life
- ▶ Better rigidity

PRECISION HOLE SAWS

Size: Depth 41 mm (1.61")

BIPICO Precision Hole Saws are manufactured from HSS M. The tooth geometry of Hole Saw is specially design by our R&D team with positive rake angle. The Hole Saws are heat treated in imported furnaces in inert atmosphere resulting consistency.

Salient Features & Advantages :

- ▶ Variable teeth with positive rake angle induce cutting vibrations.
- ▶ Special heat treatment resulting faster cutting than conventional Hole Saw
- ▶ Provide extra sweep clearance when cutting thicker metal section.
- ▶ The better Drill geometry giving easier penetration into the material.
- ▶ Smooth cut and have less tendency to snag on, contact with irregular surfaces.
- ▶ Bipico Hole Saw is useful in cutting Cast Iron, Mild Steel, Cast Steel, Stainless Steel, Ferrous Alloys, Galvalume, Bronze, Brass, Wood, Hardwood and Plaster.
- ▶ Hole Saw is useful for variety of applications like production, maintenance.

HOLE SAW KIT

Hole Saw Kits are available for cutting any material. Each kit consist of assorted Hole Saws in different sizes for use in the electrical, plumbing, interiors decoration etc. In addition to these special purpose universal kit that is suitable for a variety of applications. The standard kits have in them BiMetal M42 - 8% Cobalt Hole Saws of variable TPI.

General Purpose Kit

Plumbers and Electrician Kit

ARBORS

BIPICO provides 3 type of Arbors to make suitable for PRECISION HOLE SAWS. Its having hex shank for better grip & interlocking provision.

Arbor Types :

- BPA03 - Hex Shank 8mm (3/8") - Suitable for Dia. 14mm to 32mm Hole Saws
- BPA05 - Quick Release Hex Shank 8mm (3/8") - Suitable for Dia 35mm to 210mm Hole Saws
- BPA06 - Quick Release Hex Shank 11 mm (7/16") - Suitable for Dia 35mm to 210mm Hole Saws

UNIVERSAL HOLE SAW

Size: Depth 27 mm (1")

BIPICO Universal Hole Saws are manufactured from HSS M42 (8% Cobalt) grade imported Bimetal Strips. The tooth geometry of Hole Saw is specially designed by our R & D centre for cutting variety of material resulting consistency in hardness & better toughness. Universal Hole Saw is single piece construction with built Arbor & Drill.

Salient Features & Advantages :

- ▶ Cutting depth is 27 mm giving double life than conventional Hole Saws.
- ▶ Specially design & precision tooth geometry for cutting variety of materials.
- ▶ Cutting at higher speed with better and smooth finish.
- ▶ Useful in cutting of all different types of soft and hard material.
- ▶ Higher hardness & toughness of HSS teeth for excellent cutting & longer life.
- ▶ Better rigidity

PRECISION HOLE SAW

Size: Depth 41 mm (1.61")

BIPICO Precision Hole Saws are manufactured from HSS M42 (8% Cobalt) imported Bimetal Strips. The tooth geometry of Hole Saw is specially design by our R&D centre. The tooth design is variable pitch with positive rake angle. The Hole Saws are heat treated in fully automated CNC controlled imported furnaces in inert atmosphere resulting consistency in hardness & better toughness.

Salient Features & Advantages :

- ▶ Variable teeth with positive rake angle reduce cutting vibrations.
- ▶ Special heat treatment resulting faster cutting than conventional Hole Saw.
- ▶ Provide extra easy clearance when cutting thicker metal sections.
- ▶ The better drill geometry giving better penetration into the material.
- ▶ Smooth cut and less tendency to snag on, contact with irregular surface.
- ▶ BIPICO Hole Saw is useful in cutting Cast Iron, Mild Steel, Cast Steel, Stainless Steel, Aluminum, Duralun, Inconel, Non Ferrous Alloys, Babbitt, Bronze, Brass, Wood, Hardwood and Plywood of Ply.
- ▶ Hole Saw is useful for variety of applications like production, maintenance, electrical panel manufacturing, Plumbing and carpenters.

HOLE SAW KIT

Hole Saw Kits are available for cutting any material. Each kit consist of assorted Hole Saws and accessories that are specifically designed for use in the electrical, plumbing, interiors decoration etc. In addition to these special purpose kits, we offer a general purpose kit and universal kit that is suitable for a variety of applications. The standard kits have in them Bimetal M42, 8% Cobalt Hole Saws of variable TPI.

General Purpose Kit

Plumbers and Electrician Kit

Universal Kit

ARBORS

BIPICO provides 2 type of Arbors to make suitable for PRECISION HOLE SAWS. Its having hex shank for better grip & interlocking provision.

Arbor Types :

- BPA23 - Hex Shank Item (3/8") - Suitable for Dia 14mm to 22mm Hole Saws
- BPA25 - Quick Release Hex Shank Item (3/8") - Suitable for Dia 20mm to 270mm Hole Saws
- BPA26 - Quick Release Hex Shank 11 mm (7/16") - Suitable for Dia 20mm to 270mm Hole Saws
